Frontend Developer Exam

- **Use Angular and Bootstrap**
- **<u>Write the logic yourself</u>**
- **Comment the code**

Requirements:

- Write a web app that contains a form with a number input field and a display area

- Write code that will implement the following:
  When a user write something in the input field the application should:
  - validate that the input is a number
  - validate that the number is bigger than 0
  - validate that the number smaller than 1,000,000,000
  - If the validation fail, display an error message in the display area:
    "Please enter a number, that is bigger then 0 and smaller than 1,000,000,000."
  - If the number is valid then transform the number to a text string, for example:
    if the number the user has entered is 123456789 than display in the display area:
    "One hundred and twenty three million, four hundred and fifty six thousand, seven hundred and eighty nine."

- Write a test to validate your code

- ZIP the entire project and send it to ravidor@insert.io.

There are multiple ways to implement this application; choose whatever you feel is the best way to do it.

If you need to make assumptions, please do so and comment it in the code.
